

Date : 14th May 2014

The 60K Agility Logistics building in Dubai, Jafza is the first participant of the Emirates Energy Star Programme under the Logistics sector, and we take this opportunity to express our sincere appreciation and gratitude for the services that are being offered by Pacific Controls and Etisalat through this initiative.

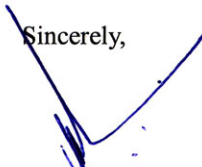

As we are on the verge of completing the first year, the programme has benefited us more than anticipated and we shall continue to incur Emirates Energy Star service for the coming years.

The carbon reduction proposed was not only achieved but also surpassed due to the extra effort put forward from Pacific Controls team which is highly appreciated.

The 60K Agility facility, encompassed with warehouses and offices, and equipped with Emicon water cooled chillers and numerous air side equipments was a difficult vertical to control but Pacific Controls with its unique control strategies provided us savings close to 17%. This performance transcends the proposed savings.

We would surely recommend this programme. Not limiting to energy savings but also aids to be a proud participant of UAE green initiative to reduce carbon footprint of UAE by 2020.

Sincerely,

Cyril David Dias
