

## MARINA DIAMONDS 1, 2 and 4

It is with great pleasure and enthusiasm that we are writing to endorse Emirates Energy Programme initiated by Pacific Controls Systems and Etisalat. For the last 2 years that my facility is under this programme, we have saved 13% in our building's energy consumption. For us, this initiative is astonishingly effective. We hope our perspective will be helpful to you as you evaluate this exceptional strategy from two of the leading companies in UAE.

Our first contact with EES was during the summer of 2012, when EES team surveyed our facility for energy savings opportunity. One of their applications that caught our interest to join is the unique platform called Galaxy, that can be used in monitoring equipment as well as the whole facility in one single dashboard. The best part of this programme is the benefit of the procedure in reducing energy use and therefore bills, parallel to which, we also gain recognition for supporting a green initiative that works in every sector, be it commercial, residential buildings; government or private sectors.

With participants from a variety of backgrounds, there were often conflicts, and occasionally confrontation. While setting limits, EES team managed to respond consistently with respect and compassion. The experience had a profound effect on the participants and, because of EES team's exceptional skill and professionalism, we had decided to let them manage three more of our buildings.

On behalf of our whole team, we highly recommend this programme and we are proud to be a part of this.

Sincerely,

A handwritten signature in blue ink, consisting of a large, stylized 'A' followed by a horizontal line and a flourish.
