

21<sup>st</sup> May, 2014

On behalf of ICC, we would like to convey our appreciation and satisfaction for Emirates Energy Star Programme, initiated by Pacific Controls systems in partnership with Etisalat.

International Cricket Council located in Dubai Sports City savours the benefits of the programme in terms of reduction in electricity consumption and monetary savings. Even though we encountered few difficulties during the initial stages, we have successfully tackled them with help of the expert control mechanisms put in effect by Pacific Controls.

Few features that are worth meritorious in regard to the programme is Optimization i.e.; during EES installation and commissioning no additional equipment were added or replaced from the facility, instead they optimized the operation of existing one, secondly the facility gets a 24\*7 alarm monitoring services from Pacific Controls which is like having a virtual BMS operator for the facility under one roof i.e. Global Command Control Centre (GCCC), thirdly having Galaxy as a tool by which we can monitor the facilities performance and have a better understanding on the operation strategies.

With a current savings of 11%, we would certainly like to recommend this programme to most organizations. Thanks to the effort by Pacific Controls and Etisalat, ICC is now the proud participant of UAE green initiative to reduce the carbon footprint of UAE by 2020.

Thank you once again for the good work.

Yours sincerely,
