Sheikh Khalifa Medical City would like to thank and express our ingenuous appreciation to the Emirates Energy Star Programme initiated by Pacific Control and Etisalat aiming to reduce the carbon footprint of UAE.

Being one of the prestigious participants of the programme, two of our facilities, Sheikh Khalifa Medical City and Abu Dhabi Blood Bank, continue to incur Emirates Energy Star service and are particularly impressed with the savings achieved so far.

Encompassing several 'Centers of Excellence', Sheikh Khalifa Medical City, managed by Cleveland Clinic, serves as the flagship institution for SEHA's healthcare system. The Abu Dhabi Blood Bank functions as the major blood source for SKMC and the majority of Abu Dhabi's hospitals, supplying blood 24 hours a day. To control and monitor the HVAC devices in such facilities and deliver the savings was in itself a challenge Pacific Controls was willing to take and proved to be successful.

The total of 687,996 square feet premises, is been benefited through Emirates Energy Star programme by culminating an average savings of 19% on our energy bills over a period of 20 months. The 24*7 Global Command Control Centre at PCS Headquarters, Jebel Ali serves as the centre of excellence, to where the systems are connected and controlled remotely.

Pacific Controls commitment to serve mankind by reducing the carbon footprint of UAE is highly appreciated. Sheikh Khalifa Medical City team wishes Emirates Energy Star a phenomenal success in the days to come.

Sincerely,

Eng. Stephen A. Bridgman
