Subject : Letter of appreciation for Pacific Control Systems LLC on successful implementation of Emirates Energy Star program in Thuraya Telecommunications Tower

We at Thuraya Telecommunications want to express our sincere appreciation for the services that are being provided by Emirates Energy Star, a national - level energy efficiency program in UAE partnered by Pacific Control Systems and Etisalat.

The carbon reduction proposed was not only achieved but also surpassed due to the extra effort put forward by Pacific Control team which is highly appreciated.

The facility located in Dubai is a 2B+G+5P+14 storey office facility, with server rooms. The 129,830 square feet premise is a tough ground for energy savings with minimal complaints. Energy conservation measures (ECMs) were implemented on the Carrier Chiller plant as well as the Fresh Air Handling units. These systems were monitored and controlled remotely through the 24x7 PCS Global Command Control Center.

Emirates Energy Star program through its inimitable energy management strategies delivered us a remarkable saving of 15% on your energy bills over 18 months. This performance transcends the proposed saving and aid to the corporate social responsibility of Thuraya Telecommunications.

We are sure our experience with Emirates Energy Star will continue to be a positive one throughout the project.

We appreciate their heart felt efforts towards their goal.

Best Regards,

Mohammed Imran Saeed
A/Senior Manager Procurement and Administration
